

WYNIT Inc. To Relocate & Expand!

Posted on: 3/16/2006

(East Syracuse, NY) –March 16, 2006— WYNIT, Inc, an East Syracuse company, announced plans today to move its corporate and sales offices to a newly renovated facility in North Syracuse in the second half of this year. The decision will save local jobs and add nearly 60 new positions.

“WYNIT has experienced tremendous growth during the past several years and current space limits our ability to expand and meet the need for additional employees,” explained Geoffrey Lewis, President and CEO. WYNIT, a wholesale distributor of technology and consumer electronics products and software, is currently located at 6847 Ellicott Drive in East Syracuse. The company also has distribution and warehouse operations in Albany, NY, Memphis, TN and Fresno, CA.

According to Lewis, relocating to newly renovated space will allow the company to expand its sales and service operations to handle the expanding number of customers the company is acquiring from throughout the US.

Lewis noted that the company invested more than \$1 million in this project and will use funds made available through New York State and Onondaga County Development Agencies, to add 60 new positions to the current staff of nearly 180. The new space will occupy approximately 50,000-square-feet.

“All the employees of WYNIT have worked very hard to grow this company and we appreciate the continued support from the Governor, Empire State Development, the Onondaga County Industrial Develop Agency and, the towns of Clay and Dewitt for all their support. Managing growth is always a challenge and we feel fortunate to be doing business in New York State and to be able to remain and grow in Onondaga County,” said Lewis.
